To Whom It May Concern:

This letter is to provide reference National Construction, Inc. regarding their ability to perform general contractor services. Alamogordo Public Schools is proud to call National Construction, Inc. a partner in the new construction, renovation and repair of our facilities. Although, this relationship as lasted many years, I have been witness to their quality work for the last five. I have been very pleased with the professionalism and expertise during this time.

Most of our jobs with them have been renovations to older facilities. The team at National are very helpful in researching and identifying general conditions and working with the District to develop solutions which are both sound construction and cost effective. The result is renovation projects that we are proud of. They also employ subcontractors that take great pride in their work. Through the last five years National has been the GC on nearly 20 renovation/repair projects and I can say that there has not been a single project that APS was not satisfied.

Furthermore, National Construction, Inc. was selected by the District to construct Desert Star Elementary School. This school is over 68,000 SF, with a budget over \$15M. They were able to build this new elementary school under budget with very few change orders (most of which were owner initiated). We are very proud of this school and are incorporating much of the design aspects and construction strategies employed for future new construction projects.

APS is proud of the work provided by National Construction and would recommend them to any organization who is either building a new facility or renovating an existing facility. If you would like to discuss National's capabilities and expertise as a general contractor, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Vance Lee', is written over the typed name.
